

**CITY OF WINNEMUCCA
DEMOLITION PERMIT**

A demolition permit is required to demolish any building over 200 s.f.; or one-story in height; or any building with plumbing fixtures.

In addition, a completion (or surety bond) shall be posted before beginning demolition. The bond shall be in the amount of fifty cents (\$0.50) per square foot of the building to be demolished or five hundred dollars (\$500.00), whichever is greater.

Before demolishing any non-residential structure that contains plumbing fixtures, an inspection is to be scheduled so that the number of plumbing fixtures can be counted and recorded.

(A credit for sewer/water connection fees will be applied to a new structure built on the same property if the permit is obtained within five years of the sewer/water fixture demolition and if the number of plumbing connections removed is on record).

A final inspection must be requested upon completion of the demolition. Before scheduling the final all concrete and debris must be removed from the lot; all holes and depressions filled-in and the lot "rough graded".

The sewer line must be exposed at the property line – cut and plugged. Do not cover until this office has inspected and approved.
